

# Package: rsf (via r-universe)

September 17, 2026

**Type** Package

**Title** Report of Statistical Findings in Quarto

**Version** 1.0.0.9000

**Description** A report of statistical findings (RSF) project template is generated using a Quarto book.

**License** MIT + file LICENSE

**URL** <https://github.com/dchiu911/rsf/>, <https://dchiu911.github.io/rsf/>

**BugReports** <https://github.com/dchiu911/rsf/issues>

**Imports** gert, renv

**Encoding** UTF-8

**Roxygen** list(markdown = TRUE)

**Config/roxygen2/version** 8.1.0

**Config/pak/sysreqs** git libgit2-dev libssl-dev

**Repository** <https://dchiu911.r-universe.dev>

**Date/Publication** 2026-09-17 00:24:11 UTC

**RemoteUrl** <https://github.com/dchiu911/rsf>

**RemoteRef** HEAD

**RemoteSha** cf92f26063e13c9ec1f401f04eea59c01475a61d

## Contents

|---------|---------------------------------|
| use_rsf | <i>Use RSF project template</i> |
|---------|---------------------------------|

---

### Description

Create a new Quarto book R project using the RSF template. Intended for use in RStudio menu, not interactively.

### Usage

```
use_rsf(path, ...)
```

### Arguments

|      |                                                                                                                                                                                                   |
|------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| path | project path                                                                                                                                                                                      |
| ...  | project configurations supported: <ul style="list-style-type: none"><li>• initialize git repo via <code>gert::git_init()</code></li><li>• initialize renv via <code>renv::init()</code></li></ul> |

### Details

This function is called when the user selects File > New Project > New Directory > Report of Statistical Findings using Quarto. The directory name can be specified, and the user can choose to initialize the project as a git repository and/or use with renv.

### Examples

```
## Not run:  
# Don't run interactively. Use RStudio Create Project menu.  
use_rsf(path = ".")  
  
## End(Not run)
```
